

# **System Design Document**

## **1 Introduction**

### **1.1 Purpose and Scope**

This section provides a brief description of the Systems Design Document's purpose and scope.

### **1.2 Project Executive Summary**

This section provides a description of the project from a management perspective and an overview of the framework within which the conceptual system design was prepared. If appropriate, include the information discussed in the subsequent sections in the summary.

#### **1.2.1 System Overview**

This section describes the system in narrative form using non-technical terms. It should provide a high-level system architecture diagram showing a subsystem break-out of the system, if applicable. The high-level system architecture or subsystem diagrams should, if applicable, show interfaces to external systems. Supply a high-level context diagram for the system and subsystems, if applicable.

#### **1.2.2 Design Constraints**

This section describes any constraints in the system design (reference any trade-off analyses conducted such, as resource use versus productivity, or conflicts with other systems) and includes any assumptions made by the project team in developing the system design.

#### **1.2.3 Future Contingencies**
